There's more than a whiff of orientalism in French Art Deco, as those in the know, like Erica Broberg, do know. "We latched onto the idea of Asian design, and took our inspiration from the gardens of Kyoto," she explains. The *japonisme* theme dictated metallic paper panels from Gracie Studio, a studied simplicity in detailing, and the use of pinks as delicate as cherry blossoms. Deco touches include bullnose edges, gold frames with silver backings and mother-of-pearl accents.
